

EMPLOYEES MUST KEEP CORNS OFF

SAYS THEY DESTROY EFFICIENCY
BUT CAN BE LIFTED RIGHT
OUT NOW.

Many large retail establishments now insist that every employee have cornless feet, because one can not appear pleasant before a patron or be fully efficient when the brain is constantly reminded of these painful pests.

The simplest method known to give relief is to apply a few drops of fresh corn directly upon the tender, aching corn, which promptly relieves the soreness and soon the corn, root and all, lifts right out without pain.

A quarter ounce of fresh corn will cost very little at any drug store but is sufficient to remove even a hard or soft corn or callus from one's feet.

This drug is gummy when dried in a moment and seems to just shrivel up the corn without inflaming or even irritating the surrounding tissue or skin.

This should interest many men and women here.

MINSON HELD FOR THE SUPERIOR COURT. Is Charged With Raising Check from \$6 to \$10.

Harry Minson, charged with raising the amount of a check made out to his credit from \$6 to \$10, was brought over to the next term of the superior criminal court when he appeared before Associate Judge Crandall in New London police court Wednesday.

Minson was arrested 10 days ago on the complaint of Alton T. Miner, by whom he was employed and on whom the check was drawn. He entered a demurrer which was overruled by the court and probable cause found.

CASCARE'S SELL TWENTY MILLION BOXES PER YEAR

BEST, SAFEST CATHARTIC FOR
LIVER AND BOWELS, AND
PEOPLE KNOW IT.

THEY'RE FINE! DON'T STAY
BILIOUS, SICK, HEADACHY
OR CONSTIPATED.

Enjoy life! Keep clean inside with Cascare's. Take one or two at night and enjoy the nicest, gentlest liver and bowel cleansing you ever experienced. Wake up feeling grand. Your head will be clear, your tongue clean, breath right, stomach sweet and your liver and thirty feet of bowels active. Get a box at any drug store and straighten up. Stop the headaches, bilious spells, bad colds and bad days—Brighten up. Cheer up. Clean up! Mothers should give a whole Cascare's to children when cross, bilious, feverish or if tongue is coated—they are harmless—never gripe or sicken.

FALLS CO. TO ERECT NEW BUILDING

Plans Are Being Made for Waste House—Hanover Congregational Church to Have New Parish House—Garage Erected at Corner of Broad and Warren Street.

The Falls company has made plans for the erection of a building on the property on Yantic street which will be used as a waste house. The building will be 15 feet square and 16 feet high. The foundation will be constructed of stone and concrete, the walls brick and the roof will be wooden. The first floor will be constructed of concrete and the second floor of wood. The building will be constructed of concrete and the second floor of wood. The building will be constructed of concrete and the second floor of wood.

Plans for Building Permit.
The H. F. and A. J. Dawley lumber dealers, have applied to Fire Marshal Howard L. Stanton for permit to erect a frame garage on the new dock.

New Parish House for Hanover.
Plans are being made for a parish house which will be erected for the Congregational church in Hanover. The main building will be 30 feet x 70 feet, while the two wings will be 20 feet x 30 feet. The building will be of frame construction, made of wood with a shingled roof. The building will be used for social affairs, with a kitchen, a hall, and a room for the church. The building will be erected by the church and the plans will be ready for the architect's drawing the plans.

BUILDING AND BUSINESS.

Few Projects During Past Week—Bank Clearings Increase.

The clearings of the Hartford banks for the past week show an increase of 6.3 per cent over the like week of last year, and those of New Haven for the same period a gain of 25.4 per cent.

Sales of real estate by warranty deed during the week in the cities of the state reported in The Commercial Record numbered 287, a decrease of 10 from the like week of last year, while mortgage loans for the week totaled \$1,010,955, as against \$984,156 for the corresponding week of a year ago.

Petitions in bankruptcy last week numbered three, with total assets of \$24,881 and total liabilities of \$32,104, which is a better showing than last year, when there were six petitions filed in Connecticut having assets of \$14,023 and liabilities of \$21,935.

New companies formed last week numbered 12, with total capital stock of \$500,000. Last year in the corresponding week the same number of companies were organized, but with less capital stock, the total for last year being but \$300,000.

Building permits were issued last

TELLS STUDENTS CAUSE OF COLLEGE TROUBLE.

President Sykes Addressed Mass Meeting in New London Hall.

By invitation President Frederick H. Sykes of Connecticut College, who addressed a mass meeting of students in New London hall Tuesday afternoon, said that the cause of the trouble now going on between himself and the board of trustees, Dr. Sykes said, was the question of the college's financial condition and the board's policy in the matter.

In the course of his address President Sykes said the college does not lie in the administration of the college. We have not only cause to congratulate ourselves upon the faculty, students, the spirit, the appreciation of the community, the state and states beyond its borders, and the world of education, but also because of the looking at the institution as the first splendid attempt to unite the old education with the new, the old and the new in the much narrower, less important, less significant phase. What, for instance, are my relations with the board?

"Trouble centers in the board of trustees, particularly in one section of the board, but also because of the fact that this question during the last

SOME GOOD ADVICE

Strengthened by Norwich Experiences.

Kidney disease is too dangerous to neglect. At the first sign of backache, headache, dizziness or urinary disorders, you should give the weakened kidneys prompt attention. Eat little meat, take things easier and use a reliable kidney tonic. There's no other kidney medicine so well recommended as Doan's Kidney Pills. Norwich people rely on them. Here's one of the many statements from Norwich people.

C. S. Bennett, motorman, 45 Palmer Street, Norwich, says: "I know Doan's Kidney Pills are good. They helped me a lot when I used them some years ago. I haven't had occasion to use Doan's Kidney Pills now in a long time."

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Bennett had. Foster-McIlwaine Co., Props., Buffalo, N. Y.

CRAVING FOR DRUGS AND LIQUOR

THE KEELEY INSTITUTE, West Haven, Conn.

NEW LONDON.

New Garage Started.
Work has been started on the proposed garage at the corner of Williams and Rosemary streets for Louis S. Sweeney. The plans call for a one-story building, 60x100 feet, of hollow tile blocks, with a stucco exterior and steel roof. The heating will be by steam.

New Business Block.

James T. Sexton, who recently purchased the Cady property on State street, is now planning to erect a new business block on the site. The building will be a three-story high, of brick, arranged for stores and offices.

Bids In.

Bids have been submitted for the proposed changes to the building adjoining the Lyceum Theatre for C. J. Dix. It is the probable that the changes will be made in the plans before the contract is awarded.

MIDDLETOWN.

Denise O'Brien & Sons have the contracts for the mason work and C. E. Zimmerman Erects Garage.

George E. Zimmerman has erected a modern wooden garage on his property at the corner of Broad and Warren streets. The building is single frame construction, has a concrete foundation, is 12 feet x 20 feet. There are five windows, double doors and a single door. When the first gets out of the ground he will lay a concrete floor.

AGRICULTURAL INTERESTS.

PERFECT SCORES BY

TWO PENS AT STORRS.

An Unusual Announcement in the Egg Laying Contest.

The hens at Storrs are still forging ahead. In the 20th week of the contest, the two pens, Rhode Island Reds and Leghorns, have each laid 200 eggs, a record for the contest. The contest was started on Jan. 1, and the two pens have been laying eggs at a steady pace ever since.

The volume of new work for the past week is not very large, but the prospect for a brisk spring building is good. Laid among the new projects are a brick apartment building, a store and apartment buildings, and a number of frame houses in Hartford, addition to manufacturing buildings, a large building in Waterbury, addition and alterations in city hall in Derby, three-story brick building in New Britain, a new parish house in Norwich, and building for the County Home in Norwich, addition.

spring and summer. Meetings have been held in connection with Winthrop House and the field house, which I believe I should have notified.

"In respect to the efficiency of the extension work, I am very pleased. This led to the conclusion that one or two pens were infested with intestinal parasites. The infestation was considered serious, as a good vermifuge, followed by a purgative dose of opson salts, usually means quick recovery. One of the pens, the Rhode Island Reds, was infested with the parasites. The other pen, the Leghorns, was not infested. The Rhode Island Reds were given a dose of opson salts, and the Leghorns were given a dose of vermifuge. The Rhode Island Reds recovered quickly, and the Leghorns continued to lay eggs at a steady pace.

CHEAP EGGS NEXT WINTER

Can Be Secured Next Month by Packing Them in Water Glass.

Under normal conditions the price of "henery" or strictly fresh eggs is about 24 1/2 cents a dozen at wholesale some time during the month of April. A natural question in the mind of many people now is "How can we get eggs at a lower price than this?"

At present, the price of eggs is about 24 1/2 cents a dozen at wholesale. This is a high price for eggs, and it is a price that is paid for eggs that are not fresh. The price of eggs is high because the supply of eggs is low. The supply of eggs is low because the hens are not laying eggs at a steady pace.

EVERY COMMUNITY NEEDS MORE GARDENS

By P. G. HOLDEN.

NEVER before in the history of America has the value of home gardens been more greatly realized than at the present time. In every large city the high food prices can be seen in a large measure solved by home gardens. A smaller class even in some of our great agricultural states, parents have been forced to take their children from school that they may help support the family.

Ordinarily 40 per cent of the wages of workmen is spent for food. This year, because of the enormous increase in the price of food necessities the percentage is a great deal higher. Home gardens, vacant lot gardens, school gardens, furnish one of the quickest and most practical remedies for present conditions.

In great centers of population energetic steps are being taken to utilize every available foot of soil in the production of food. In Chicago a vacant lot garden movement has been started. The newspapers, city officials, health department, civic societies, schools, large corporations and individuals are joining forces in a home garden campaign. Three hundred and fifty thousand school children of the city have been enlisted in the great army of gardeners.

School Gardens.
Pittsburgh has a school garden department in its public schools. Each year from 1,000 to 2,000 children in 15 or 20 schools grow large quantities of vegetables, and the garden habit has spread to the homes of the pupils. The city club of Pittsburgh has for years been active in promoting home gardening. Germany has taken advantage of the home garden to offset the food shortage during the pressing needs of war.

In every town and city in America vacant lot garden associations should be formed. A club leader or advisor should be secured. He should be thoroughly qualified and competent to advise the young people who want to plant gardens. As the garden provides at least one-third the supplies for the table, the average family, by growing a garden, can save at least one-third the cost of living. At present prices they can save a larger per cent.

A garden, well managed, will produce an abundance of nourishing food during the hot months of the year. By canning, preserving or pickling a liberal supply for the winter months, the saving made possible by the garden will extend through the entire year.

A home garden will reduce the grocery bills, assure better health, provide fresh vegetables for the family and reduce the amount of high-priced meat consumed, promote the habit of thrift, increase the standard of citizenship.

Home Grown Vegetables Best.
The most valuable money to any community is that which circulates repeatedly through its trade territory. Money expended for imported fresh or canned vegetables is sent out of the community.

Vegetables grown in our gardens and canned at our homes are better, fresher and cleaner than those we buy at the stores. A garden means a greater variety of things to eat. In most instances those who have gardens will have vegetables to sell to thirsty neighbors.

Conditions for gardening vary in different localities, but there is no city in which gardening cannot be made profitable. The Pittsburg State Commission found that the greatest precipitation of soil and clinders in that city was in the Woods Run Settlement district. Yet in that district 180 children, between 8 and 14 years of age, raised, in 1915, vegetables valued at \$720.60. A few vacant lots, each child having a plot of ground only 9 by 12 feet in size. Some of this vacant land had been filled to the depth of eight or more feet with old cans, brick, rock, etc., and it was necessary to haul dirt for a considerable distance to cover this refuse.

At Ambridge, a manufacturing suburb of Pittsburgh, 225 plots of ground, each 70 feet square were planted to gardens by 250 families. By the end of the year the vegetables raised were valued at \$1,000.00. The vegetables were sold to the families, and the money was used to buy more vegetables. The vegetables were sold to the families, and the money was used to buy more vegetables.

Gardens promote health. The family that raises a garden does not allow refuse to accumulate. If there is manure around the barn, it is used on the garden and ceases to become a breeding place for flies. In gardening, members of the family are brought into the open air and sunshine. This is highly beneficial to those who work in mines or mills.

rubbing or crossing other limbs, and remove the least desirable of the two. If the tree is still too full of branches, the sunshade will be prevented from reaching the inner parts of the tree. When the foliage is too dense, the branches from the thickest parts. High colored fruit will not develop unless the tree is open and the sun can get in.

Care should be taken when sawing off a branch that the bark is not split and torn. Such wounds are unsightly and slow to heal. Any limb two inches or more in diameter should be sawed off from the lower end. The wound should be smoothed with a plane and the bark should be painted over with a good paint. Large wounds should be painted every year or two until entirely grown over.

Healthy trees which have had severe pruning or heading back will often be filled with a very vigorous growth of water sprouts or suckers. These should be removed every year or two until entirely grown over.

When starting look for several young branches in the main limbs spaced from one to three feet apart. These should be cut back so that they will not extend up into the air a few feet. However, possible head these branches back to a twig which extends sideways to make the tree spread in the lower limbs. Use the maximum young healthy-bearing surface without crowding, and to keep the tree from the under limbs. If the growth is all tall and unbranched, then these branches are cut back to three or four feet, often lower with the idea that they will be used to branch and the next season the best of them may be selected.

Treatment of Old Headed Apple Trees.
Dehorning and tree butchery are synonymous terms. The operation is often successful, but the tree dies later on.

When it is desired to head back old trees to make spraying and harvesting easier the work should not be done by cutting the branches off at the dead wood should be removed and a few of the upper limbs, thus making the tree more open and healthy. The water sprouts or twigs will grow on the lower limbs where it is desirable to have new growth. Use the liquid only once. A new solution is much cheaper than a case of spoiled milk. The liquid is made by using the method of procedure is as follows:

Mix 1-2-3 quarts of commercial water-glass with eighteen quarts of boiled or distilled water. Stir thoroughly. The resulting solution will be sufficient for 20 dozen eggs. Pour the solution over the water sprouts and the eggs from a small flask where only a few eggs are available each day. The solution will be profitable and the eggs each day will be collected.

For best results preserve only fresh, clean infested water sprouts. Use the liquid only once. A new solution is much cheaper than a case of spoiled milk. The liquid is made by using the method of procedure is as follows:
